WCPA OVERVIEW

The Western Canada Pilot Car Association was formed in February, 2012 after an unfortunate accident. On January 14th, 2012 near Fort McMurray, Alberta a pilot car operator lost her life while carrying out the duties of her job. After an outcry for changes to safety policies and a need for public awareness of the dangers involved in the transportation of over dimensional loads, the WCPA was formed.

The first goal of the WCPA is to seek change and support from government bodies to promote safety on our highways throughout Western Canada.

A membership provides an individual with:

- The ability to attend general public meeting
- The opportunity to bring forward and address new ideas to improve safety standards in relation to the movement of over dimensional loads
- The right to a vote on these issues, thus contributing to greater safety on our highways.

"Western Canada Pilot Car Association's primary goal is to improve driver safety through increased public awareness, industry training and legislative initiatives."

- Larry Boroski, President WCPA
